Description

Electrical & meter cabinets are built on a frame of square tubes, which are subsequently clad with profiled aluzinc sheets.

The electrical & meter cabinets are divided into two rooms for electrical parts and electrical meters, separated by a partition.

The cabinets only require minimum maintenance with a long service life of 35–40 years depending on the surroundings and the location.

The electrical & meter cabinets have 2 lockable doors and removable roofs. The doors can be locked with padlocks and triangle locks. The cabinets can be manufactured according to customer wishes.

Materials

Aluzinc sheet, 1,25 mm.

Foundation: Build up of hot-dip galvanized 3 mm plate.

Color

Typically painted in green URKI-TEXT 1042 (textured paint). Can alternatively be painted in a color of your choosing based on the RAL color chart.

Standard surface treatment:

Frame, foundation and FU cover: Hot-dip galvanized reg. DS/EN 1461

Sides and roof: Aluzinc plate acc. to DS/EN 10364

Painting of cabin external: C4-H acc. to DS/EN 12944

Options

Surface treatment external: C5-H acc. to DS/EN 12944.

Foundation: Painted to IM3 acc. to DS/EN 12944.
